

Experience

Jonathan is a detail-oriented forensic engineer who excels in managing intricate contracts, conducting comprehensive regulatory assessments, and delivering outstanding results. He has extensive expertise in building services and related regulatory structures. Utilizing his robust analytical abilities and foresight, he identifies crucial trends and minimizes company expenses. Jonathan operates with heightened awareness and is driven to refine processes continually.

As the founding Director of Basic Expert, Jonathan transformed his vision into the company's core concept, goals, objectives, and strategic direction. In his daily operations, he is responsible for regulatory compliance, strategic direction, operational integration, product planning, and financial management.
